payment boards.

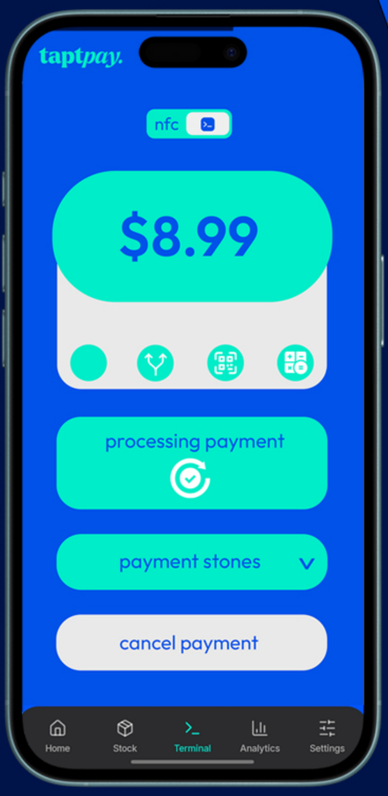

throw out your old eftpos mechine
welcome the payment boards

QR code & NFC tags all on payment boards that will be connected to each payment page.

we provide a standard a5 size
& any design.
if you can think it, we can make it

with any of our packages you can get your own custom design or chose from one of our standard designs.

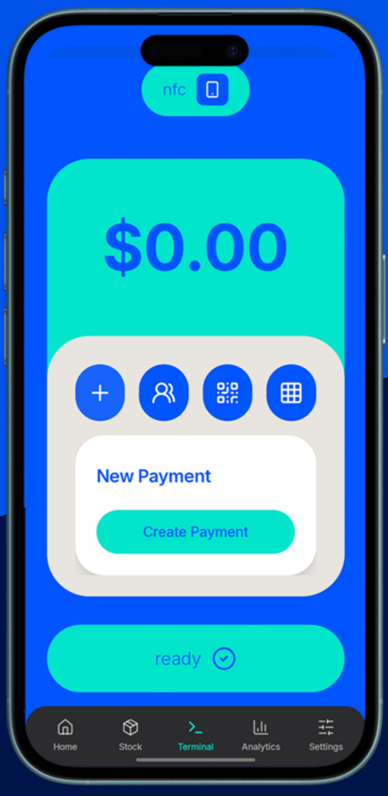

online terminal

web-app based terminal with all features needed for seamless transactions

stack & share

you're able to stack payments and have multiple on the go at the same time.

you can share payment links via text message, QR code & email.

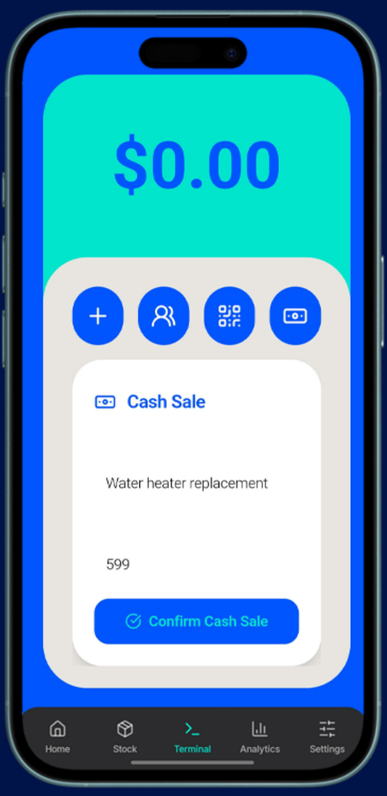

paywave

If all else fails & a customer wants to pay with their physcial card, we can accommodate with the standard paywave feature

only available on iphone

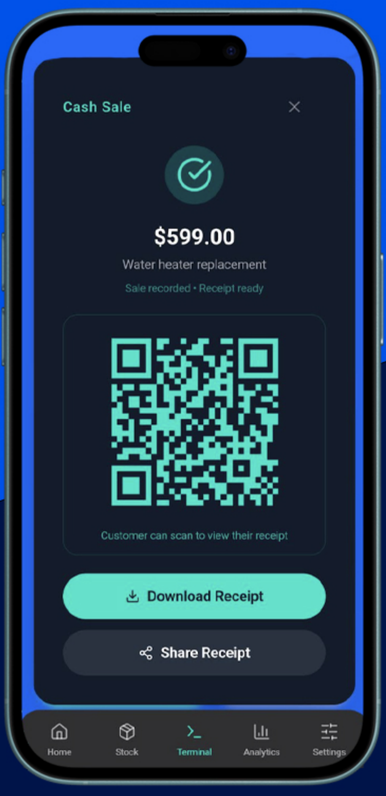

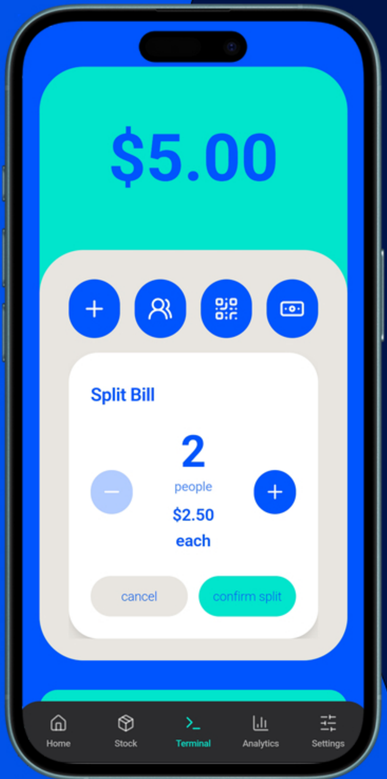

cash transactions

you can now process cash payments and provide an instant digital receipt. everything tracked and ready.

receipt generation

any transaction you process will auto generate a full GST receipt. easily sharable via a QR code, text email.

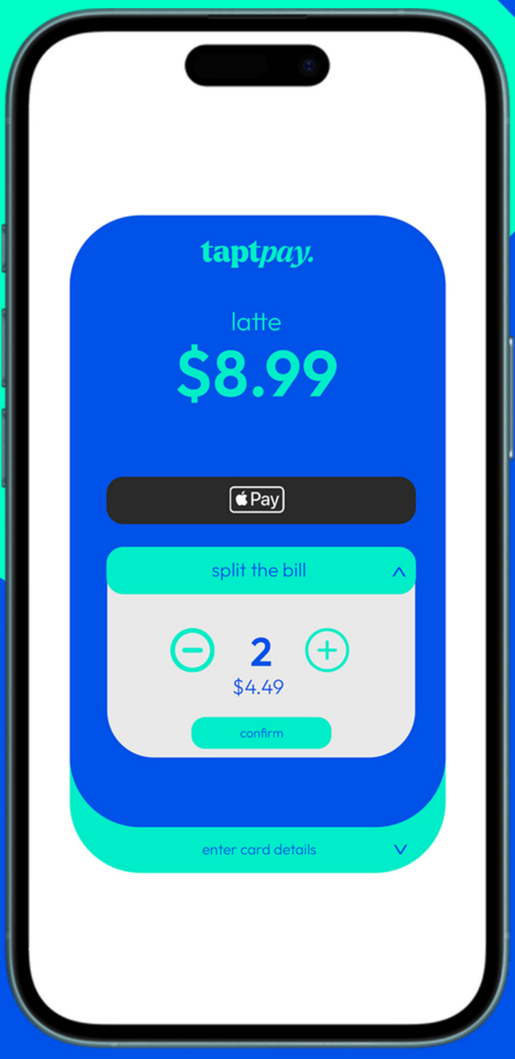

split the bill

merchants & customers can now split the bill on either side.

It’s never been easier

splitting the bill?

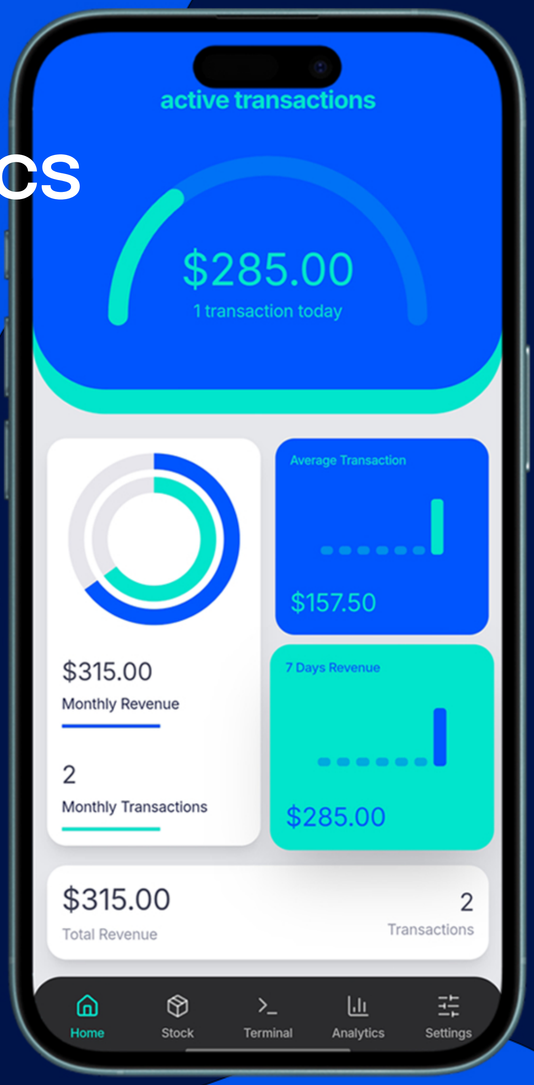

customers can now split their bill without the merchant having to lift a finger.

before they pay via their digital wallet, they can divide the bill in anyway they like, enter custom amounts & pay their share.

merchants can still split any customers bill from their end with a click. This removes a barrier for customers and keeps the flow of business moving.

dashboard

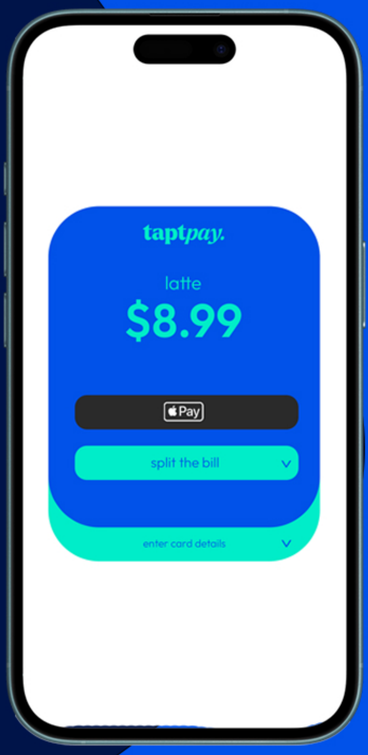

- live sales as they happen
- google analytics integration
- track the data you need
- daily, weekly, monthly sales

your **TaptPay** dashboard puts your most important numbers front and centre. No logging into a computer, no digging through spreadsheets.

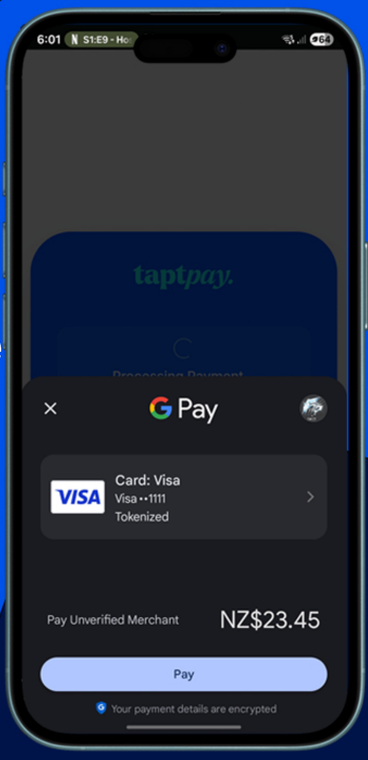

Just open the app, and you'll see everything - active transactions, revenue breakdowns, and performance trends - all updating in real time

how do they pay?

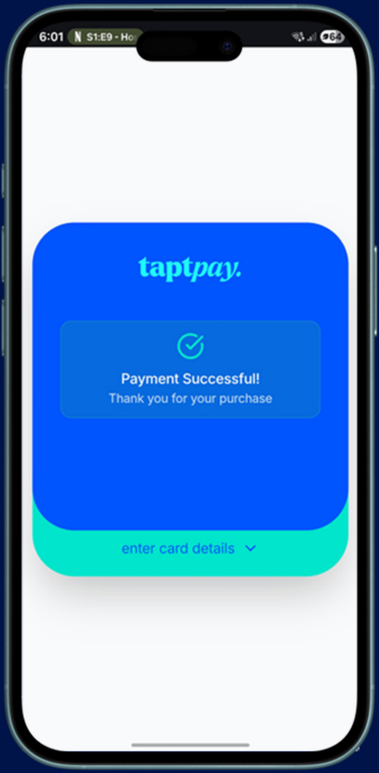

customers can use any payment
method active in their digital wallet

the payment page has a fast loading time, purpose built to require very little internet speed.

if customers dont have a payment method in their digital wallet they can.have the option to add their card details
via the drop down or tap their card to pay with our paywave feature.

available for e-commerce

what does it cost?

you will be charged $0.10 per transaction (billed monthly) by adding a credit card/debit card to the system via the settings page.

flexible pricing structure

no monthly subscription charge for less than 100 transactions.

$9.99 per month when volumes exceed 100 transactions.

standard A5 payment boards - $25.99 per board

custome payment boards will be quoted on request.
